Commercial Pressure Switches Class 9013, Type F and Type G—Description

The Class 9013 Type F line of pressure switches are UL Listed and CSA Certified as commercial control equipment. The Class 9013 Type G line of pressure switches are UL Listed and CSA Certified as commercial/light industrial control equipment.

The Type FHG - PUMPTROL® Compressor Pressure Switch is used to control electrically driven air compressors and is diaphragm actuated and has contacts that open on rising pressure.

**Type FHG - PUMPTROL®
Compressor Pressure Switch**

The Type FSG, FYG, FRG - PUMPTROL® Water Pump Pressure Switches are used to control electrically driven water pumps and have the following features:

- The Type FSG is the standard water pump switch, suitable for all types of pumps: jets, submersible, reciprocating, etc.
- The Type FYG is designed to meet higher horsepower and pressure requirements.
- The Type FRG is reverse acting: the contacts open on falling pressure.
- All are diaphragm actuated.

**Type FSG, FYG, FRG- PUMPTROL®
Water Pump Pressure Switch**

The Type G - PUMPTROL® Commercial/Light Industrial Pressure Switch is used to control electrically driven water pumps and air compressors. It has higher electrical ratings for direct control of motors in pump and compressor applications. The Type G switch is diaphragm actuated and has contacts that open on rising pressure.

**Type G - PUMPTROL®
Commercial/Light Industrial
Pressure Switch
shown with Form X-release valve**

Commercial Pressure Switches
Class 9013, Type F and Type G – Technical Overview

Operating Points (Settings)

Every pressure switch has two operating points; one on rising pressure and one of falling pressure. The operating point on rising pressure is referred to as the TRIP POINT or cut out for pumps and compressors and the operating point on falling pressure is referred to as the RESET POINT or cut in for pumps and compressors. These operating points are called the SETTINGS of the switch.

- TRIP POINT (rising pressure)
- RESET POINT (falling pressure)

Differential

The differential is the difference in pressure between the trip point (cut-out) and the reset point (cut-in). It can be adjustable or nonadjustable (fixed). Example:

Cut-in	30 psi
Cut-out	50 psi
Differential	20 psi (50-30 psi)

Range

The range is the pressure limits within which the operating points (settings) can be adjusted. The range of the Class 9013 pressure switch is referenced to the operating point on rising pressure (trip point). The differential subtracts from the trip point setting.

During the normal operating cycle, system pressure should never exceed the upper limit of the range when using a diaphragm actuated switch. This will greatly reduce the life of the diaphragm.

Maximum Allowable Pressure

Maximum allowable pressure is the pressure to which a switch can be subjected without causing a change in operating characteristics, shift in settings, or damage to the device.

Pressure surges may occur in a system during the start up of a machine or from valve operation. Surges are not normally detrimental to the life of a switch if the surge is within the maximum allowable pressure rating of the switch. Diaphragm actuated switches should not be subjected to more than 10 surges per day. More frequent surges will greatly reduce the life of the diaphragm.

Commercial Pressure Switches Class 9013, Type F and Type G – Specifications

Pressure Code (fixed differential)

Below is the pressure code table for fixed differential action devices. Existence of a code does not imply that the code is available for any or all devices.

Settings	Code
Off at 100 PSI	J27
Off at 110 PSI	J37
Off at 115 PSI	J38
Off at 120 PSI	J69
Off at 125 PSI	J52
Off at 135 PSI	J39
Off at 140 PSI	J68
Off at 150 PSI	J55
Off at 155 PSI	J40
Off at 175 PSI	J59
Specify other pressure	J99

Special Features And Modifications For Type FHG

Description	Form Letter
Standard Pack of 20 Switches	C20
Addition of a Second Ground Screw	G4★
Maintained Manual Cut-Out Lever (AUTO-OFF)	M1
Pulsation Plug	P
1/2" Conduit Bushing – 1/2" Long Thread - On Left	T
1/2" Conduit Bushing – 1/2" Long Thread - on Right	T1
Slip-On Connectors (Load Side Terminals Only)	U
Slip-On Connectors (Line and Load Terminals)	U2
Factory Sealed Range Stud	W
Two-Way Pressure Release Valve	X
Quick Connect Two-Way Pressure Release Valve (for use with Polyflow Tubing)	X1
Black Cover	Z22

★ Can be field installed. Nameplate should then be marked with the Form letter and maintenance and ordering records corrected.

Ordering Information

- Specify Class 9013 Type FHG.
- Select pressure code from Pressure Code Table and add code designation to end of type number. Be sure that pressure code falls within the limits of the device as shown in the device listings.
- If special features are desired, add the appropriate Form letter to the Class and Type. Arrange Form letters in alphabetical sequence when ordering more than one special feature.
- Place packaging code at end of sequence with other forms when ordering.

For standard pack of 20 devices per box C20

For individual packaged devices leave blank

Example: 9013FHG19J52MIXC20

NOTE: If no packaging code is indicated, devices will be shipped individually packaged.

Special Features And Modifications For Type FSG, FYG & FRG Devices

Description	Applies to	Form Letter
Standard Pack of 20 Devices per box	All Type F	C20
Pilot Light - Indicates Switch Contacts Closed	FSG, FYG	G5 ★
One Normally Open-One Normally Closed Contact	FRG 2 Pole Only	H
Maintained Manual Cut-Out Lever (AUTO-OFF)	FSG, FYG	M1
Momentary Manual Cut-In Lever (AUTO-START)	FRG2-59 Only	M3
Low Pressure Cut-Off (AUTO-START-OFF) Operates at Approximately 10 PSIG Below Cut-in and will turn off the pump	FSG, FYG (Types 1-20 only)	M4
Maintained Manual Cut-in Lever (AUTO-ON)	FRG2-59 Only	M5
Pulsation Plug (Standard on FSG-4 and FYG-4)	FRG, FSG, FYG	P♦
Salt Water Flange (1/4" NPSF Internal Only)	All Type F	Q
Plastic Flange (max. temp. 120°F) (max. pressure 80 psi)	FRG, FSG, FYG 1/4" NPSF Internal Only	Q8
1/2" Conduit Bushing - 1/2" Long Thread - on Left	All Type F	T
1/2" Conduit Bushing - 1/2" Long Thread - on Right	All Type F	T1
Slip-On Connectors (Load Side Terminals Only)	FSG, FYG	U
Slip-On Connectors (Line and Load Terminals)	FSG, FYG	U2
Black Cover	FSG, FYG	Z22

- ★ Can be field installed. Nameplate should then be marked with the Form letter and maintenance and ordering records corrected.
- ♦ Nylon pulsation plug can be field installed on types having 1/4" NPSF Internal connector. Part number 1530-S6-G1 is one bag of 50 plugs
